3. MONTHLY DISCLOSURE REPORT ON INVESTMENT PORTFOLIO

The Treasurer's Pooled Investment Fund market value balance ending December 31, 2020 was \$9.623 billion, up from \$8.238 billion on September 30, 2020. The yield on December 31, 2020 was .35%, down from .54% on September 30, 2020. The drop in market yields was due to the slowing economy caused by the resurgence of COVID restrictions. The Federal Reserve assured the markets that they were prepared to keep rates near zero for however long it takes to recharge the economy, and, Congress approved a second stimulus package which will pour \$900 billion more cash into the system. While the very low yield being produced by the portfolio is disappointing, our number one priority for investing remains the safety of principal.

Monthly Commentary

COVID Downturn, Vaccine Hope

The resurgence in COVID cases and slower rollout of vaccinations across much of the country has caused concerns over the pace of the economic recovery. The market was focused on fiscal stimulus spending, dovish monetary policy, and vaccination progress as fixed income rates changed slightly.

United States' GDP contracted 3.5% in 2020, its first annual contraction since 2009 following the financial crisis of 2007–2008. The level of this contraction marked the year 2020 as the country's worst economic performer since 1946. Nonfarm employment fell by 140,000, following a 336,000 job gain a month earlier. Most of that drop was in the leisure & hospitality sector, which lost 498,000 jobs as the resurgence of COVID caused consumers to pull back from high contact activities.

Construction remains exceptionally strong and the industry added 51,000 jobs, with large gains in both the residential and commercial categories. Home construction continues to heat up as builders move to satisfy rising buyer demand. Total housing starts jumped 5.8% to a 1.67-million-unit pace, which is the strongest pace since 2006.

Housing has benefited from record low mortgage rates and desire for more living space.

Riverside County has seen higher home price gains versus the majority of similar size counties in the United States. The most recent single-family median home price data for Riverside County shows a 15.9% year over year gain, with the price now at \$445,000, still much lower than San Diego County (\$716,000), Los Angeles County (\$752,000), and Orange County (\$890,000).

The yield curve became steeper as news on fiscal stimulus pushed long rates higher while fiscal policy continued to anchor short rates at near zero. About \$4.1 trillion in fiscal stimulus has been authorized so far to support the economy, including tax relief provisions. The President-Elect unveiled a plan that would further add \$1.9 trillion in support, this caused rates in the long end to move higher. On January 27, the FOMC voted to leave FED rates at the current target rate of 0.00% to 0.25%. The official statement and press conference did not include any new guidance related to changes in their asset purchase program that would change the view that short term rates will remain low for longer.

Monetary support is truly historic. The Federal Reserve opened their new year balance sheet with \$7.36 trillion, an increase of more than \$3 trillion over the prior 12 months. The Fed continues to purchase Treasuries and MBS at a monthly pace of \$80 billion and \$40 billion, respectively, with no signs of tapering soon.

As a result, the equity markets retreated slightly, with the Dow Jones Industrial Average starting the month at 30,600 and ending at 30,000. In Fixed Income Markets, the 2-year Treasury yield began the month at 0.12% and ended the month at 0.11%. The 5-year Treasury yield began the month at .36% and ended the month at .42%. Note that the 5-year yield rose while the 2-year yield declined slightly. This is known in the business as 'curve steepening' and is commonly thought to show inflation fear entering the Fixed Income Markets. The Treasurer-Tax Collector's office will continue to monitor these types of signals and adjust strategies accordingly.

Inflation Worries Driving Long Yields Higher

In February, longer termed rates increased as a result of positive vaccination news and pending prospect of additional economic stimulus. Treasury Notes with maturities greater than 5 years moved substantially higher, while rates for maturities of 1 year and shorter moved lower. This resulted in a steeper yield curve for February, a trend that developed in the previous month. The spread between the 3-month Treasury Bill and the 10-year Treasury Note rose to 1.32 from 0.99 in January.

The news on COVID-19 was positive, with cases and hospitalizations decreasing as the number of vaccinated climbed. On Feb 27, the FDA approved J&J's COVID-19 vaccine for emergency use, giving the U.S. a third tool to fight the pandemic and a boost to market sentiment.

Also, on February 27, the U.S. House of Representatives passed a \$1.9 trillion pandemic aid package, a major step toward enacting the third round of stimulus. The bill is expected to get passed when it goes to the U.S. Senate next. The impact of further stimulus on inflation, was heavily debated during the course of the month, with some traders feeling that this will pump far too much cash

into the system all at once and create a spending frenzy. The GDP forecast for next year has risen, with many expecting growth to be in the range of 4% to 7%+.

In testimony before the Senate Banking Committee, Federal Reserve Chairman Jerome Powell stated that "the United States has a "long way" to go to return to full employment, even as he expressed cautious optimism that the economy will recover from the pandemic this year." A pointed reminder to markets that fed funds will remain low for longer.

The payroll report released in early February saw 49,000 jobs created, this is still far below the 300,000 per month amount that is considered to be healthy for the U.S. economy. The weakest sector for jobs remains leisure and hospitality, with the stringent COVID-19 restrictions keeping most bars and restaurants either closed or only open for take out orders.

CPI, excluding food and energy, a measure of inflation used by the Federal Reserve to gauge the appropriateness of monetary policy, fell from 1.6% YoY to 1.4% YoY this month. A level that is below the Federal Reserve's target of 2.0%.

On the real estate front, housing remains the strongest economic driver for the U.S., with 10.1% year over year growth as of January. Riverside County experienced even more impressive price increases, with a 20.3% year over year print! The County's median single-family home price now stands at \$469,000. This trend is expected to stay strong nationally, as evidenced by February's 10.4% increase in building permit applications.

In financial markets, February saw the Dow Jones Industrial Average climb from 30,100 to 31,000. The 2-year Treasury yield rose from 0.11% to 0.13% and the 5-year Treasury yield rose from 0.43% to 0.73%. However, in the front end of the yield curve, the story was quite different. The 3-month Treasury Bill dropped from 0.048% to 0.033%. This is a reminder to investors who must invest in the short end of yield curve, like the County, that this low interest rate environment will continue to be painful.

Monthly Commentary

Economic Recovery Strengthens

Improved economic conditions and broadened vaccine programs continue to drive the Treasury yield curve steeper. Longer term interest rates are rising amid optimism about the pace of U.S. economic growth, accompanied by some nervousness about higher inflation. With monetary policy remaining supportive with rates near zero, the yield curve again steepened. For investors like the Treasurer-Tax Collector Pooled Investment Fund (TPIF), the narrative of persistence near zero rates in the front end of the yield curve points to the continued pain of low investment yields.

Hopes for a global economic recovery are pinned on a successful vaccine rollout and eventual end to the Covid-19 pandemic. In the US, the CDC announced that as of March 29, 2021, more than 143 million doses had been administered, with over 93 million people having received at least one dose of the vaccine and more than 51 million people fully vaccinated. The news on infection rates was also positive. The seven-day average of daily infection cases continues to tick downward, with an average of nearly 57,000 (from 500,000) cases being recorded every day.

On March 6, 2021, the President signed a \$1.9 trillion stimulus package into law. Fiscal stimulus and pent up demand are driving economic projections higher. In the US, the annual GDP is expected to expand by 6.5% in 2021 and 3.5% in 2022. Economic data for the month was positive and supportive of the projections. ISM Manufacturing was 60.8 vs expected 58.9, a strong indicator of a rebound in manufacturing. Employment data was also strong with a Non-Farm Employment number of +379,000 jobs and the Unemployment Rate falling 0.1% to 6.2%.

Real Estate continues to be the strongest of all sectors with the S&P Core Logic 20 City Year over Year Index showing a gain of 11.1 nationally. Riverside County produced even stronger gains at +16.5%, with the County's median single home price reaching \$465,000, an all-time high.

Consumers also gained more confidence. The Conference Board Consumer Confidence index printed at a whopping 109.7, versus expectations of 96.9. Although one barometer for inflation, CPI ex Food and Energy YoY, was 1.3% and below the FED's 2% target, evidence of inflation pressures are starting to surface. The Producer Prices index

print was 2.8%, higher than the previous 1.7% level.

On March 17th, the FED affirmed its monetary policy, and voted to keep the Fed funds rate at the range of 0.00% to 0.25%. Federal Reserve Chair Jerome Powell expressed that while inflationary pressures will be felt in the future, they will be temporary and should not require the FED to make monetary policy changes anytime soon.

This propelled equity markets higher, and continued to drive intermediate and longer bond yields higher. The 2-year Treasury Note yield began the month at 0.12% and ended at 0.16%. The 5-year Treasury Note yield began the month at 0.69% and ended at 0.94%. Short rates continue to be anchored by the Federal Funds Rate at zero. The 3-month Treasury Bill began the month at 0.033% and ended slight lower at 0.015%. The 1-month Treasury Bill highlights the plight of front-end investors. It started the month at 0.033% and ended the month at -.003%.
